

WHY IS SPEEDING SUCH A BIG SAFETY ISSUE FOR FLEETS?

Speeding is more than a traffic ticket. It increases crash risk, liability exposure, and operational costs.

BY THE NUMBERS

3x

Speeding increases the risk of a crash.

-NETS

27%

of speeding-related crashes involve commercial vehicles.

-FMCSA

29%

of all fatal crashes involve speeding.

-NHSTA

Drivers with speeding patterns are often more likely to **show other risky driving behaviors**, including hard braking, tailgating, and unsafe lane changes.

These violations can impact CSA scores, insurance premiums, and driver eligibility.

MVR VIOLATIONS

Common speeding violations on an MVR:

Speeding over:

- 1-10 MPH
- 11-15 MPH
- 16-20 MPH
- 21-25 MPH
- 26+ MPH
- Exceeding Maximum Speed Limit

THE BOTTOM LINE

Speeding puts your drivers, your equipment, and everyone on the road at risk.

Addressing speeding is one of the most effective ways to improve safety and reduce risk.

Proactive monitoring makes a difference.

MVR Monitoring helps identify speeding violations early, supports targeted coaching, and reduces risk before behaviors become costly incidents.
